Greetings

It is with pleasure we send this price list into your home for your consideration.

We want to express our sincere thanks to our many customers both old and new, and for the orders for bulbs that we received, and the many nice letters, and feel assured we will do our best to please you with quality bulbs and over count.

As satisfied customers are the best advertisement for any business, we add some new varieties every year, but cannot grow all the good Glads that are on the market. Hope we may have the privilege of serving you this year.

ORDER EARLY—Please send order early to avoid disappointment, as many varieties will be sold out early. We ship as soon as weather permits.

PRICES AND TERMS—All orders cash with order or 25% down payment, balance C.O.D.

All C.O.D. orders require a down payment. For all orders less than \$2.50 please add 25c to help pay postage and packing; all orders over \$2.50 please add 35c to help pay postage and packing. We do not like to have to add this extra, but we have not raised the price of bulbs, and parcel posts, paper and sacks are all much higher so we are forced to do it. We will include extra bulbs to offset the postage and packing fee.

Ohio customers please add 3% State sales tax or 3c on the dollar. Now in effect on sales of gladiolus bulbs and bulblets. Prices on Bulblets on request.

We ship C.O.D. Request 25 per cent of the amount sent with the order.

5 bulbs at the 10 rate, for instance: 10 bulbs for \$1.00; 5 may be had for 50c.

L means large. **M** medium. **S** small. **Blts** Bulblets.

ABU HASSAN—Dark violet blue, opens several medium size blooms on tall straight spike. Much like Pelegrina in color. The most popular dark blue. **L** 2-25c; 10-\$1.00; **M** 3-25c; 10-75c; **S** 4-25c, 10-50c; **Blts** pkg. 25c.

GLAD CULTURE IN A NUTSHELL

1. **Planting Time**—April 1 to June 25.
2. **Site**—In full sunshine, well drained soil. Keep away from buildings, trees and shrubbery, stir soil often.
3. **Planting Depth**—Bulblets, 2 inches, small size inches; medium 3 to 4 inches, large 4 to 6 inches. Rows—2 to 3 feet apart.
4. **In Cutting Flowers**, leave at least 4 leaves intact.
5. **Dip**—1 tablespoon Lysol; 1 gallon water. Soak bulb 4 to 6 hours immediately before planting.

We have used and find very good the "New Improved Ceresan," as a dip at planting time. It is very strong so must use with caution.

Use 1 oz. N. I. C. with 3 gal. water add 3 tablespoons dreft as a wetting agent. Do not put bare hands in solution. Soak 15 minutes, 30 minutes for bulblets. Do not soak longer or your bulbs will not grow. Plant while wet.

6. **Thrip Spray**—2 oz. 50% wettable D.D.T. to 3 gallon water. Mix well and spray weekly after 4 or 5 leaves appear till blooming starts. Also use D.D.T. spray, 2 ozs. D.D.T. 3 gallons water: Mix well, use the 50% wettable D.D.T. for spray and 5% for dust.
7. **Dig Bulbs** about 4 to 6 weeks after varieties are done blooming usually in October. Store in coolest part of basement after bulbs have been dried thoroughly in shade.

Use D. D. T. 5% for a light dusting when putting bulbs into storage. This will eliminate any danger of thrips feeding on your bulbs while in storage. But use the Lysol dip or New Improved Ceresan dip before planting.

BULB SIZES—Large bulbs are 1 $\frac{1}{4}$ inch and up. These are your best blooms for size and some earlier as a rule, and are designated by the letter "L."

Medium bulbs $\frac{3}{4}$ to 1 $\frac{1}{4}$ inch. This size will give good bloom but not quite as early to bloom. Medium size is designated by the letter "M."

Small bulbs are $\frac{1}{2}$ to $\frac{3}{4}$ inch. This size is designated by the letter "S."

Plant small bulbs and bulblets as early as is possible to get them into the ground to give them a longer growing season, and keep weeds down. You will be surprised at your returns.

Glads are easy to grow and anyone—even a beginner—can grow the finest show flowers.
